

Aydin Dueñas Salman

Information Systems Engineer

Summary

I am an Information Systems Engineer, experienced in both web and mobile applications development, with excellent communication and problem-solving abilities. My primary focus is on Flutter development, where I specialize in building high-performance, cross-platform mobile applications.

- Spanish (native)
- English (advanced)

Experience

Mobile Developer

Ludens Productions

2022 – 2023

- Developed multiple mobile applications, using both the Flutter framework and Android Studio's Java environment.
- Designed mobile user interfaces using Figma.
- Collaborated with the backend team during the development of RESTful APIs.
- Participated in the mentoring of MVC architecture in mobile applications.

Mobile Developer

TCA Software Solutions

2023 – 2025

- Developed hotel and store management mobile apps using Flutter.
- Integrated native SDKs for iOS, Android, and DLLs for Windows in Flutter.
- Designed UIs for multiple mobile apps, ensuring a smooth and consistent user experience.
- Deployed apps to the App Store and Google Play Store, ensuring successful launches and updates.

Mobile Developer

Atarraya Smart Biotech

August – September 2025

- Translated user needs into clear requirements and prototypes, using Figma to design and improve UI for new and existing features, implementing these changes in Flutter.
- Automated tedious user flows to streamline the experience.
- Implemented flavors to manage multiple app environments.

Educational Background

Bachelor of Systems Information Engineering

Institution: Universidad de Sonora

Year of Graduation: 2023

Volunteer Work

Participant in Launch X Program

Institution: Microsoft

2022

I developed multiple applications, expanding my frontend and backend abilities using JavaScript.
